Bengaluru, KA, India

SUMMARY

SDET / QA Automation Engineer with 5+ years of experience in designing and implementing scalable test automation frameworks for mobile, web, API, and backend systems. Strong expertise in CI/CD integration, test strategy design, regression optimization, and production issue analysis. Experienced in improving release quality, reducing manual testing effort, and building automation solutions for large-scale distributed systems.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Automation Testing:** Selenium, Appium, REST Assured, TestNG, JUnit, Cucumber, XCUITest
- **API Testing Tools:** Postman, SOAP UI, REST API Testing
- **CI/CD Tools:** Jenkins, Git, GitHub, GitLab, Bitbucket
- **Databases:** SQL, PL/SQL, MongoDB
- **Cloud / Device Farms:** Sauce Labs, BrowserStack
- **Platforms:** Android, iOS, Salesforce
- **Testing Types:** Functional Testing, Regression Testing, Integration Testing, API Testing, Mobile Testing

EXPERIENCE

Member of Technical Staff

Sep 2024 – Present

Salesforce, Bengaluru

- Designed and implemented scalable **automation frameworks** for Salesforce mobile applications using Appium, XCUITest, and REST Assured.
- Developed CI/CD-integrated automated test suites enabling continuous regression testing across multiple release cycles.
- Reduced manual regression testing effort by **60%** through automation coverage expansion and optimized test design.
- Improved test development velocity by **75%** using AI-assisted automation development (ChatGPT, Cursor, Gemini).
- Built reusable automation components and SDKs to standardize testing practices across multiple teams.
- Executed end-to-end release validation and collaborated with cross-functional engineering teams to ensure production stability.
- Managed device cloud testing strategy using Sauce Labs for parallel execution and cross-device coverage.

SDET

Jun 2022 – Sep 2024

Info Edge (Naukri.com), Noida

- Developed automation frameworks for mobile (Android/iOS), web, and API testing using Selenium, Appium, and REST Assured.
- Integrated test automation suites with Jenkins CI/CD pipelines for continuous execution and reporting.
- Performed defect lifecycle management including bug reporting, RCA, and production issue analysis.
- Executed regression and integration testing for high-traffic recruitment platforms including Naukri Recruiter and Jobseeker applications.

Automation Engineer

Oct 2020 – May 2022

Nagarro, Gurugram

- Automated REST and WCF API testing for enterprise banking applications (Saxo Bank).
- Built database validation frameworks for data integrity and migration testing using SQL and PL/SQL.
- Supported SOAP to REST migration testing during enterprise system modernization.

EDUCATION

B.Tech in Information Technology

Ajay Kumar Garg Engineering College, Ghaziabad

2016 – 2020

ACHIEVEMENTS

- Awarded Most Impactful Employee for automation contributions in mobile testing domain.
- Salesforce Trailblazer Ranger certification for continuous learning in Salesforce ecosystem.
- Spot Award at Info Edge for automation framework design and CI/CD integration impact.
- NAGP Award at Nagarro for technical excellence in QA automation engineering.
